Languages: Romanian (Native), English (C1 Proficiency)

SKILLS

Frontend Developer with over 5 years of experience turning UI/UX designs into responsive, high-performance and accessible websites. Proficient in HTML, CSS, OOP, JavaScript (vanilla) and modern JavaScript frameworks such as Vue.js and React.js. Skilled in building scalable design systems, reusable UI components and ensuring cross-browser compatibility.

Experienced with CSS preprocessors (SASS, LESS), utility-first and component libraries like Bootstrap and Tailwind CSS. Contributed to projects across diverse industries including real estate, insurance, e-learning, food & beverage and HR platforms. Familiar with backend technologies including Laravel, vanilla PHP and WordPress.

Passionate about clean, maintainable code, accessibility best practices (WCAG), performance optimization and creating seamless user experiences.

EXPERIENCE

Camyre Hammer Lex, Cluj - *Web Developer*

MAY 2024 - PRESENT

- Developed and maintained custom WordPress and WooCommerce websites, including presentation sites and small online stores.

- Implemented pixel-perfect, responsive layouts based on Figma designs, ensuring brand consistency and optimal user experience across devices.

- Integrated Cookie Consent and other GDPR-compliant solutions to align with European privacy regulations.

- Resolved Google Ads disapproval issues related to tracking, domain verification and policy violations — improving campaign uptime and performance.

- Delivered technical onboarding and IT support for 20+ employees, configuring company email accounts (Google Workspace/iCloud) and training teams on Excel, Apple Numbers and internal tools.

Roweb Development, Pitesti - *Web Developer*
OCTOBER 2018 - JULY 2023

- Developed responsive, mobile-first user interfaces from Figma and Sketch designs using Vue.js and React.

- Managed application state with Vuex, React Context, Redux and Redux Toolkit.

- Created scalable UI components using SCSS, Bootstrap and Tailwind CSS, contributing to a consistent, maintainable design system.

- Designed and implemented a comprehensive frontend style guide adopted across 30+ website pages, standardizing UI components (buttons, forms, typography) and reducing development time by 40% while ensuring design consistency.

- Maintained and extended backend functionality with PHP and Laravel; integrated CMS features and customized WordPress themes.

- Presented finished products to clients and trained them on admin panel usage post-launch.

- Worked across multiple projects using Agile (Scrum), Git and project management tools like Asana, Trello and Azure DevOps.

- Boosted site speed by 35% (Lighthouse) and organic traffic by 20% by optimizing assets, lazy loading and semantic markup.

- Gained experience with Docker for setting up containerized development environments.

EDUCATION

Polytechnic University of Bucharest, University Center of Pitești - *Bachelor's Degree in Computer Science*
OCTOBER 2015 - JULY 2018

- Thesis: "Bookstore Application" (Laravel/Bootstrap, Grade: 9.3/10).
